Overall I think this is a nicely done model, maybe could move around the boxes to avoid crossing arrows.
However I think member and secretary concepts has too many things inside them. How about making a EditBoat concept including RegisterBoat and Remove boat?
And you can do the same thing with the meeting under secretary.
The showCalendar and the showMeeting are probably UI concepts and does not need to be included.

As for the review questions:

1. Would this model help me as a developer?

- Yes, I think this is quite helpful.

2. Would a domain expert understand the model?

- Yes, it's quite simple, but has a bit too much in some places which could be spread out.

3. What are the strong points about the model?

- It has good associations, and it's easy to follow the flow of things.

4. What are the weaknesses?

- It has too many things cramed into the same concepts, especially some superflous ones.

5. Do I thing this will pass the grade 3 criteria?

- Yes, with some small improvements it might even pass grade 4.
